PROJECTS

Simple Spotify — *Website* | Link | HTML, CSS, JavaScript
- A basic Spotify clone built with JavaScript, CSS, and HTML that allows users to search for and play music tracks, create playlists, and control playback features such as play, pause, and skip. It incorporates responsive design principles utilizing APIs for fetching and displaying music data.

React Portfolio — *Website* | Link | MERN Stack
- Responsive React portfolio website from scratch using JavaScript, React, and Tailwind including smooth scroll, adding social icons, custom fonts, gradient background, and responsive design.

WORK EXPERIENCE

- **Freelancing**: Collaborated with various clients to understand their video editing needs, edited and assembled raw footage into high-quality videos, ensuring smooth transitions, proper sequencing, and visual coherence, and managed a client's YouTube Channel | Link

  MAR 2022 – FEB 2023
